OTTAWA 1983 WASHINGTON

INTERNATIONAL BOUNDARY COMMISSION

CANADA AND UNITED STATES

The Honourable Allan J. MacEachen
The Secretary of State
for External Affairs of Canada,
Ottawa.

The Honorable George Shultz
The Secretary of State
of the United States,
Washington.

Sirs:

We have the honour to submit herewith to each Government two signed copies of the Commissioners' joint report upon the maintenance work done on the St. Francis River to the St. Lawrence River section of the International Boundary Line between Canada and the United States subsequent to the year 1925, under the provisions of Article IV of the Treaty between His Britannic Majesty in respect of Canada and the United States, signed at Washington, February 24, 1925.

Respectfully submitted,

Alec C. McEwen
Canadian Commissioner

Frank A. Whetstone
United States Commissioner

C O N T E N T S

INTRODUCTION

Article IV of the Treaty of Washington, February 24, 1925, provides for "the maintenance of an effective boundary line" between Canada and the United States. The article further stipulates that

> "The said Commissioners shall submit to their respective governments from time to time, at least once in every calendar year, a joint report containing a statement of the inspections made, the monuments and buoys repaired, relocated, rebuilt, moved, and established, and the mileage and location of vistas opened, and shall submit with their reports, plats and tables certified and signed by the Commissioners, giving the locations and geodetic positions of all monuments moved and all additional monuments established within the year, and such other information as may be necessary to keep the boundary maps and records accurately revised."

This joint report is the sixth in a series of special publications that provide revised or supplementary information concerning the geographical positions of the boundary monuments, turning points, reference marks and control stations that define or govern the location of the boundary between Canada and the United States.

REESTABLISHMENT UNDER THE TREATY OF 1908

Article III of the Treaty of Washington, April 11, 1908, provided for the appointment of two commissioners to reestablish and demarcate the international boundary from the source of the St. Croix River to the St. Lawrence River.

In accordance with this provision, the commissioners submitted to their respective governments in 1925 a *Joint Report upon the Survey and Demarcation of the Boundary between the United States and Canada from the Source of the St. Croix River to the St. Lawrence River.* A mathematical description and definition of this section of the international boundary is given on pages 138-266 of the joint report. The geodetic datum, or reference surface, to which the geographical positions of the boundary monuments, turning points and reference marks are mathematically related is the old North American datum as it existed in the year 1925 when the joint report was submitted.

NORTH AMERICAN DATUM OF 1927

A few years after the submission by the commissioners of their joint report under Article III of the 1908 treaty, Canada and the United States adopted a new geodetic datum. The North American Datum of 1927 became the new mathematical reference surface and it superseded the old geodetic datum used in the computation of the latitudes and longitudes of the boundary marks and boundary reference points that are published in the 1925 joint report.

The adoption of the 1927 North American Datum and the subsequent recomputation of geographical positions of the international boundary has no effect whatsoever on the physical location of the boundary line itself. All boundary monuments, reference marks and control stations that were used to define the boundary prior to the introduction of the new datum remain unaltered from their original location and they continue to define the boundary. The small differences between the new geographical positions and their corresponding 1925 published values are entirely due to mathematical readjustment, and there is no resultant change in territorial sovereignty at any point on the boundary.

Special Report No. 6 contains a list of the geographical positions on the 1927 North American Datum of the boundary monuments, turning points and reference marks along the international boundary from the mouth of the St. Francis River to the St. Lawrence River.

We certify that the foregoing tables are a true record of the conversion of the geographic positions of international boundary points from the old North American datum to the 1927 North American datum. This conversion covers the international boundary from the St. John River to the St. Lawrence River. All international boundary turning points, monuments and reference monuments, along this section of the boundary will now be published on the present official geographic datum for North America. The publication of these tables is carried out in accordance with the provisions of Article IV of the Treaty between His Britannic Majesty in respect of Canada and the United States signed at Washington, February 24, 1925.

Alec C. McEwen
Canadian Commissioner

Frank A. Whetstone
United States Commissioner
